

Wonder Product

Podiatrist Dr. Hillary Brenner has launched a new product we're obsessed with!

Well "heeled" ladies flock to Dr. Hillary Brenner's downtown office to receive her incredible medical pedicure which includes a TCA chemical peel. This unique procedure drastically improves dry, cracked heels, calluses & corns and literally peels away years of damage in one session. The wait for an appointment with Dr. Brenner is about a month, but it's well worth it. As part of her chemical peel she subscribes a daily moisturizing crème with her unique formula to the feet. We've found that this unique product is a true wonder on dry, flaky legs. After one application our editor's legs were soft, supple and fully moisturized beyond compare. We suggest you book an appointment with Dr. Brenner or at the very least pick up her amazing crème!
